LOGISTICS OPTIMIZATION

21ST CENTURY TANK MONITORING:

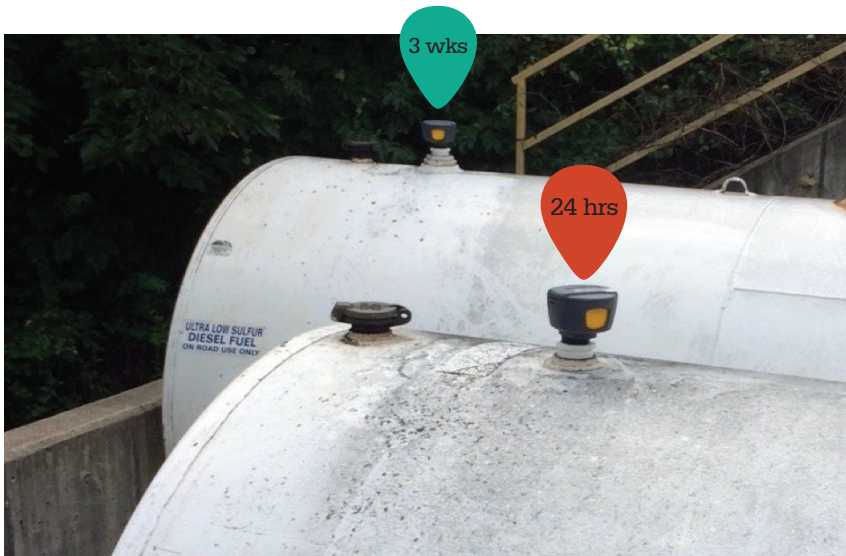

# **Deliverable Lubricants, Fuels & Waste Fluids**

 **Husky** : A BREED APART

# Transparency and savings with a simple, robust and affordable logistics solution.

## CONCEPT

We believe simple and cost-effective remote-monitoring is crucial for sustainability. For us design and robustness are key for instant value and a set-and-forget experience – we design with you in mind. As a result, our offering builds on cutting-edge battery-powered sensors and an online user experience like no other.

## MANAGEMENT

- Maximize asset utilization
- Improve customer service and retention
- Gain visibility and insight

## OPERATOR

- Enable next-level route planning
- Improve predictions and inventory management

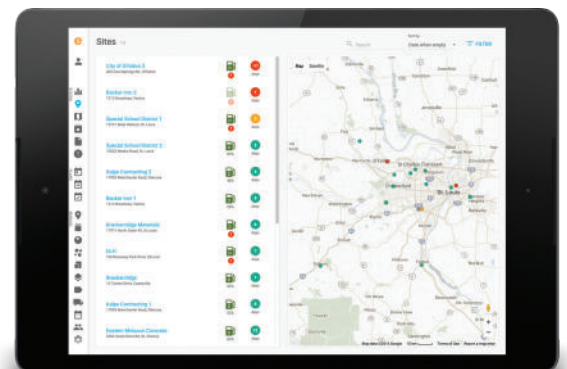

## END CUSTOMER

- End of tank sticking
- Value-adding services
- Transparency and convenience

## VALUE

Increased visibility and predictability in operations directly transfer to success for both you and those you serve.

From trends and forecasts to reports and alerts, we help eliminate emergency top-off runs while offering transparency and added value.

LOGISTICS OPTIMIZATION

## FEATURES

### **Instant Value Through Ease-of-Use**

From pricing through sensor installation and management of thousands of sites, we highly value designing for simplicity.

### **Never Again Worry About Batteries**

Military-grade lithium battery technology provides an extremely long battery life, underlining our offering as a true set-and-forget service.

### **Global Coverage – We Grow With You**

Whether you expand to another county or continent, our partnerships with more than a hundred telecom operators globally ensure we grow with you.

### **Actionable Analytics**

With ease-of-use and instant value at the core, our analytics offering has been built around at-a-glance graphs, alerts and reports.

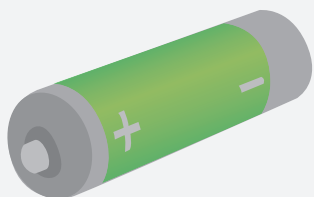

### **Always the Latest User Experience**

Our focused group of developers and designers improve our user experience in constant cycles – both on the surface and under the hood.

### **Insight You Can Rely On**

With both sensor and server software continuously improved, our analytics team puts reliable, world-class technology at your fingertips.

## TECHNICAL SPECIFICATIONS

**WEIGHT:**

1.3 lb

**ENVIRONMENTAL:**

IP Rating: IP69

**OPERATIONAL TEMPERATURE:**

-40°F / +175°F

-40°C / +80°C

**MATERIALS:**

Glass fiber reinforced polypropylene,  
proprietary polyurethane

**MEASUREMENT RANGE:**

Up to 16ft

Accuracy +/- 0.4"

**INSTALLATION:**

1.5" and 2" NPT threads

**COMMUNICATION:**

2G/3G penta-band 850 / 900 / 1800 /  
1900 / 2100Mhz

**POWER:**

3.6V Lithium battery
