

1 **EU-TYPE EXAMINATION CERTIFICATE**

2 Component intended for use in Potentially Explosive Atmospheres Directive 2014/34/EU

3 Certificate Number: **Sira 08ATEX9215U** Issue: **8**

4 Component: **V34, V34I and V34IS Liquid Fuel Dispenser Nozzle**

5 Applicant: **The Husky Corporation**

6 Address: **2325 Husky Way
Pacific
Missouri 63069
USA**

7 This component and any acceptable variation thereto are specified in the schedule to this certificate and the documents therein referred to.

8 CSA Group Netherlands B.V. notified body number 2813 in accordance with Articles 17 and 21 of Directive 2014/34/EU of the European Parliament and of the Council, dated 26 February 2014, certifies that this component has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of a component intended for use in potentially explosive atmospheres given in Annex II to the Directive.

The examination and test results are recorded in the confidential reports listed in Section 14.2.

9 Compliance with the Essential Health and Safety Requirements, with the exception of those listed in the schedule to this certificate, has been assured by compliance with the following documents:

EN 13012:2021 EN ISO 80079-36:2016

10 The sign 'U' is placed after the certificate number to indicate that the product assessed is a component and may be subject to further assessment when incorporated into equipment. Any limitations of use are listed in the schedule to this certificate.

11 This EU-Type Examination Certificate relates only to the design and construction of the specified component. If applicable, further requirements of this Directive apply to the manufacture and supply of this component.

12 The marking of the component shall include the following:

II 1 G
EN 13012 Type I

Signed: M Halliwell

Title: Director of Operations

SCHEDULE

EU-TYPE EXAMINATION CERTIFICATE

Sira 08ATEX9215U
Issue 8

13 DESCRIPTION OF COMPONENT

The V34 Vapour Recovery Nozzles are intended for the automatic delivery of liquid fuel at flow-rate of up to 40 l/min. The main bodies are manufactured from cast aluminium with a separate aluminium delivery spout assembly at the front. At the front of the V34 Vapour Recovery Nozzles there is an entry hole for the attachment of the delivery spout assembly, which is secured via a locking nut. The main bodies are fitted with a trigger type, operating lever assembly that is protected by a guard formed by the cast body, this assembly directly actuates an internal valve to control the delivery of fuel. The main bodies also contain an attitude sensing device and an over-fill cut-off device. The rear of the main bodies have a female-threaded, M34 x 1.5, entry hole to allow a suitable, liquid fuel, delivery hose assembly to be attached.

Design options

- The spout may have an additional vapour recovery sleeve fitted (V34I and V34IS only).
- The main body may be fitted with a Vapour Splash Guard.
- The main body may be fitted with a Full Grip Guard or Reguard.
- The lever assembly may be fitted with a Lever Cover.

Variation 1 - This variation introduced the following change:

- To recognise the introduction of a 'Double Poppet' variant.

Variation 2 - This variation introduced the following changes:

- The recognition of minor drawing modifications; these amendments are administrative or involve changes to the design that do not affect the aspects of the product that are relevant to explosion safety.

Variation 3 - This variation introduced the following change:

- Following appropriate assessment to demonstrate compliance with the latest technical knowledge, EN 13012:2001 and EN 13463-1:2001 were replaced by EN 13012:2012 and EN 13463-1:2009.

Variation 4 - This variation introduced the following change:

- The introduction of two types of nozzles with a moulded hand guard (keel) and a moulded lever, both are made from a non-metallic material.

Variation 5 - This variation introduced the following changes:

- The introduction of the "tilt" poppet modification to the range of Liquid Fuel Dispenser Nozzles.
- The drawings were updated in a new drawing package to show "tilt" poppet modification and to replace existing drawings: V34_ATEX replaces drawings: 004132A, 007288A and 007426A. V34I_ATEX replaces drawings: 006551A, 007289A, 007427A & 008201A. V34IS_ATEX replaces drawings: 006606A, 007312A & 007428A.

Variation 6 - This variation introduced the following change:

- Introduction of Part No 013835 – Poppet Stem Bushing, and replacement of Part No 000020 – Packing Seal, with Part No 012080 – Short Packing Seal.

Variation 7 - This variation introduced the following change:

- Standards upgraded to the latest versions.

None

16 ESSENTIAL HEALTH AND SAFETY REQUIREMENTS OF ANNEX II (EHSRs)

The relevant EHSRs that are not addressed by the standards listed in this certificate have been identified and individually assessed in the reports listed in Section 14.2.

17 CONDITIONS OF MANUFACTURE

- 17.1 The use of this certificate is subject to the Regulations Applicable to Holders of CSA Group Netherlands B.V. certificates.
- 17.2 Holders of EU-Type Examination Certificates are required to comply with the conformity to type requirements defined in Article 13 of Directive 2014/34/EU.
- 17.3 Each V34 Vapour Recovery Fuel Dispenser Nozzle will be subject to the routine testing as described in clause 7, B.9, B.11, B.12 and B.13 of EN 13012:2021.
